Clario signs letter of intent to integrate HIT's Notifi Critical Test Result Management Solution into zVision for improved radiology workflow

SEATTLE, WA and EXTON, PA February 12, 2010 — Clario and HIT Application Solutions signed a letter of intent to integrate HIT's Notifi Critical Test Result Management (CTRM) Solution into Clario's zVision unified worklist for improved radiology workflow. The integration will provide radiologists with a closed-loop system for communicating critical results to referring physicians.

zVision is a true unified worklist that integrates a multi-system environment providing superior access to patient information. zVision offers intelligent real-time dashboard and practice statistics, advanced search and filtering, results communication tracking and integrated peer review. zVision's integration with Notifi CTRM Solution offers radiologists a single source for accessing their workflow tools for communicating critical results.

The timely communication and receipt verification of critical test results is paramount to providing the best patient care possible. HIT's Notifi critical test result management application simplifies this essential task and ensures timely and accurate communication and verification occurs while at the same

time improves the efficiency of all care providers. Notifi satisfies the Joint Commission (JCAHO) and American College of Radiology (ACR) critical test result management compliance criteria.

“Clario’s goal is to provide radiologists with a single source to access all the tools needed to be most efficient. Offering our customers an integrated closed-loop communication system will provide many customers a tool to be more efficient communicating and tracking critical results to referring physicians.” says Chris Wood, CEO at Clario.

“We are pleased to integrate Notifi into Clario’s zVision system. zVision improves radiology workflow by delivering the information and tools to the radiologist from one user interface. The integration of Notifi will further improve workflows and provide an important patient safety tool to zVision customers. ” states Michael Rosamond, HIT Application Solutions Vice President.

About Clario

Clario partners with hospitals, imaging centers and private practice radiology groups to improve radiologists’ efficiency through integration. Clario’s flagship product, zVision, provides a benchmark unified worklist, intelligent real-time monitoring of practice statistics, advanced search, communication tracking and integrated peer review.
