Clario Signs Carle Foundation Hospital

SEATTLE – WA. Carle Foundation Hospital, has chosen Clario, a leader in radiology software, to manage the workflow of their 18 radiologists.

The Clario worklist integrates with hospital EMRs and existing Radiology department solutions, streamlining the workflow for Radiologists and simplifying communication between Radiologists and staff within Carle’s health system.

“Clario was selected because it provided all the necessary functions we require in our practice. In addition to being a powerful and highly configurable worklist manager, it offers a variety of other features such as peer review, image QA and robust business intelligence that will greatly enhance not only our radiologists’ productivity but the quality of our work,” said Juan J. Jimenez, M.D., Associate Medical Director of Radiology, Carle Foundation Hospital and Carle Physician Group.

“We are thrilled to be working with the Carle Radiologists and technical staff. Their commitment to providing the best patient care while continually improving their operational efficiency ensures that they will get the most out of our product,” said Clario’s CEO, Chris Wood.
