Radiology Associates, P.A. Selects Clario Smart Worklist

Seattle, WA and Little Rock, AR — Radiology Associates, P.A. (RAPA) has selected Clario's smart worklist as their new workflow solution. RAPA's investment in a smart worklist is the latest initiative in RAPA's ongoing effort to provide a superior level of service to their customers.

RAPA reads for multiple sites with an emerging statewide presence. Implementing the Clario Smart Worklist will workload balance exams across all radiologists at all locations, ensuring that the right radiologists are reading the right exam at the right time.

"After an extensive search and selection process, we selected the Clario system based upon their proven ability to optimize workflow at other large radiology practices and their shared commitment to using the latest technology", said Clark Davis, CEO of RAPA

"We are excited to be partnering with RAPA, one of the most respected private radiology practices in the USA. Their philosophy of empowering physicians by giving them the best technology to do their job makes them exactly the type of practice we like to partner with", said Chris Wood, CEO of Clario

###

About Radiology Associates, P.A.

Radiology Associates is among the oldest business enterprises in Arkansas and is one of the oldest continuously operating medical practices in the United States. We have provided significant national leadership to Radiology and consistently have been at the forefront of technologic innovation. For more information, visit www.rapaxray.com.

About Clario

Clario has developed workflow management software. The software allows radiologists to reconstruct their workflow with Clario's comprehensive worklist, portal and practice management tools, making radiologists day-to-day operations and patient care more productive and efficient.
